

Section 1: Driveway and Parking Areas (rev. 2/15/11)
(within 150' frontage X 300' depth)

Criteria	Ranking System	Points
A) Access road, driving, parking surfaces, shoulders and ditches are stable	0 = evidence of extensive erosion 1 = evidence of some erosion 2 = no evidence of erosion	
B) Width of driveway is minimal	0 = width is greater than 15' 1 = width is 15' 2 = width is less than 15'	
C) Stormwater flow is directed to a vegetated buffer or stable vegetated area	0 = stormwater is NOT directed 2 = stormwater IS directed	
D) Stormwater moves as a sheet flow over crowned driving surfaces	0 = extensive ribboning and/or erosion 1 = minimal ribboning and/or erosion 2 = No ribboning and/or erosion	
E) The parking area/apron is defined, minimal and located outside buffer areas	0 = undefined, excessive or in buffer 2 = well defined but excessive. 3 = well defined and minimal and outside buffer area.	
Total Points Available = 11	Total =
